

## Water System Equipment

# SUPERstor

Sure Marine Service offers the Superstor brand water heater. This heater is constructed from an outer shell of polyethylene encasing a high-tech foam that reduces heat loss to ½ degree F an hour. The tank itself is constructed from 316 stainless steel. The electrical element is constructed from stainless steel and has a brass base making it more resistant to salt corrosion than the standard galvanized bases of other brands. The Superstor tanks are available in 6, 12 and 20 gallon sizes and come with a 5 year standard warranty.

Super Stor Marine Water heaters are UL marine listed, NFPA #302, Hud 280-707 and USCG spark protection requirements Title 33 CFR Part 183.

Model #	Weight:	Capacity:	Heat Exch. Area:	Recovery rate:	Dimensions:
SS-6M	19 lbs.	6 gal.	2.5 sq ft	22 gal/ hr	14 ¼" diameter x 16 ¼" H
